

Health Ministries Association
Faith Community Nurse
Mentor Program

HMA recognizes that many FCN begin their role as a lone practitioner without the benefit of a health system or network to provide them nurturing environment for growth and development both spiritually and professionally.

Upon completion of a Foundational FCN curriculum, the novice FCN needs guidance and support in order to establish and sustain a successful professional practice.

The HMA FCN Mentor Program has been established to link the novice FCN with an experienced HMA FCN leader in order to facilitate the sharing of knowledge, experiences, and wisdom and to encourage growth and achievement by providing an open and supportive environment.

We invite you to consider being a part of this exciting program.

Requirements to participate:

- Recently Completed a Foundational FCN course
- Membership in HMA
- Seeking support and guidance in your new FCN practice
- Willing to commit to a one year relationship with an experienced FCN who will work collaboratively with you in your FCN practice development

Please Contact the HMA FCN Mentor Program Chair if you are interested in serving as a Mentor to request an interview process.
